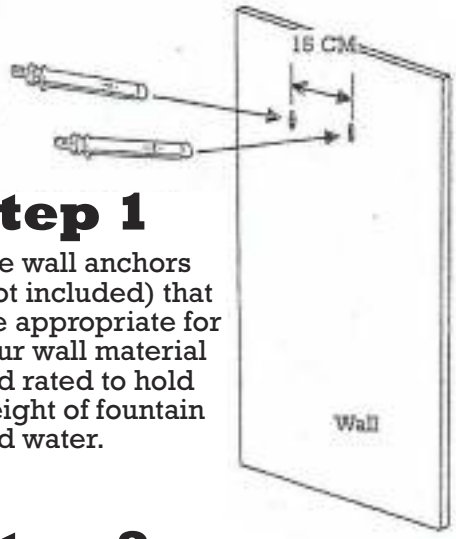
KY-207
House of York Lion Sculptural Fountain

design TOSCANO®

INSTRUCTIONS FOR YOUR PRODUCT

Thank you for your recent purchase of this Design Toscano hand-crafted garden fountain. We have taken great care to create this piece especially for you. Please review these instructions and assemble this piece with care.



Step 1

Use wall anchors (not included) that are appropriate for your wall material and rated to hold weight of fountain and water.

Parts

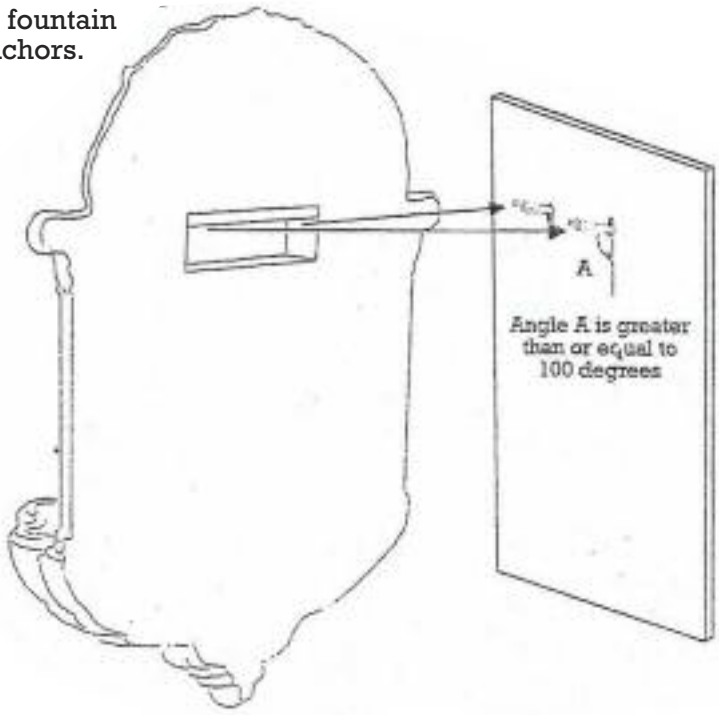
Wedge Screw Anchor - Not Provided

Step 3

Place pump in basin, fill with water to submerge pump and plug in.

Step 2

Hang fountain on anchors.



Adjust the pump flow rate to achieve the desired effect and to minimize any splashing. Splashing can occur if the flow rate is too high or the feature is too full. The flow rate can be increased or decreased by moving the flow rate control slider on the pump body. Moving the switch towards (+) will increase the flow rate and moving it towards (-) will decrease it.

WARNING:
Never turn on the pump before the fountain is full of water. Also do not let the water level fall below the top of the pump as the pump will become damaged if run without water. Fountain should be placed on a level surface.
