

design **TOSCANO**[®]

INSTRUCTIONS FOR YOUR PRODUCT

Thank you for your recent purchase of this Design Toscano hand-crafted garden fountain. We have taken great care to create this piece especially for you. Please review these instructions and assemble this piece with care.

ASSEMBLY

1. Place the base (E) on the ground on a stable, level surface.
2. Place the bowl (D) on the top of base (E).
3. Insert the pump cord into the plastic pipe and bring the plug out from the bottom of base.
4. Place the figurine (A) into bowl (D), attach tube hanging from the bottom of figurine (A) to pump (B) in position.
5. Fill the fountain with water, fully submerging pump. For proper operation the pump requires a minimum of 2 inches of water.
6. Plug the pump into an electrical socket and turn on.
7. Add water as needed.

WARNING:

Never turn on the pump before the fountain is full of water. Also do not let the water level fall below the top of the pump as the pump will become damaged if run without water. Fountain should be placed on a level surface.

Adjust the pump flow rate to achieve the desired effect and to minimize any splashing. Splashing can occur if the flow rate is too high or the feature is too full. The flow rate can be increased or decreased by moving the flow rate control slider on the pump body. Moving the switch towards (+) will increase the flow rate and moving it towards (-) will decrease it.
